ACR C-Light™ & C-Light™ H₂0

Manual/Water-Activated Emergency Signaling Light

More About the C-Light™ series:

The compact, rugged and waterproof C-Light and C-Light H₂O are USCG/SOLAS approved and have a 20 lumen LED that operates typically for 30 hours continuously. These steady-on personal distress lights feature an impact resistant case – making them reliable, multi-purpose lights whenever efficient distress lighting is needed.

The C-Light is activated manually with an easy twist On/Off activation and the C-Light H₂O model includes two activation methods; the light can easily be activated with a simple push of the On/Off button or when in the armed position, can be activated automatically when immersed in water.

The slim, lightweight and versatile design of these lights allows them to fit easily in a pocket or hang discreetly when attached to a life jacket or backpack. The flexible lashing loops on the side of the products allow for multiple mounting options including the webbing on your backpack or straps on your life jacket. The Velcro® strap can be secured around the lashing loops and creates countless additional mounting possibilities. The lights also come with a clip designed to conveniently slide over your inflatable life jacket's oral inflation tube for storing your light inside your life jacket.
