

Lifelink Throwing Line

The LifeLink Throwing line comes in a highly visible yellow bag with 23m of floating line and can be used in hand or attached to the rail for MOB retrieval and meets ISAF regulations.

The smaller of the "LifeLink MOD devices" offers maximum flexibility for storage and is quick and easy to deploy, ideal for Sailing, Boating, Canoeing, Rafting and getting a line ashore. Featuring a hand loop on top & attachment loop at ends it enables both the rescuer and casualty to be connected.

User instructions are printed on the reverse side of the bag. The deployment loop has a PVC cover which aids grip and allows easy and quick rescue if required.

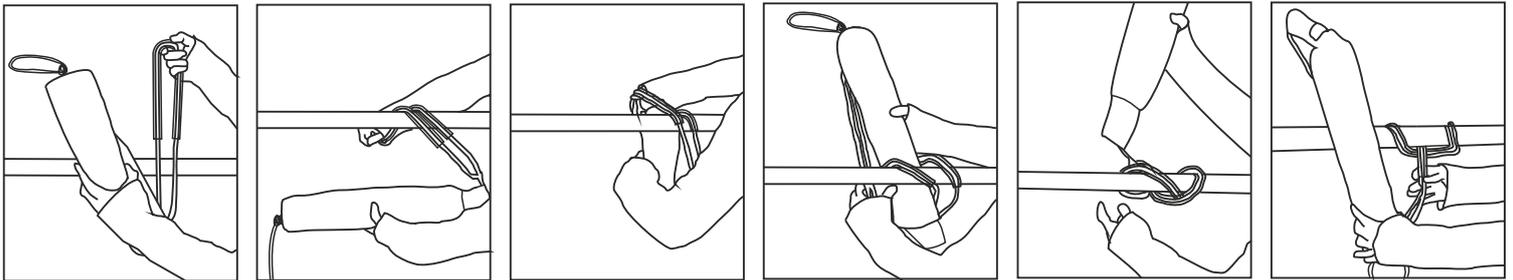

A versatile product that can be used as a standard throwing sock or attached to the rail deployed and towed behind the vessel whilst circling the casualty. In both cases once the casualty has made contact with the line, they can be pulled or winched towards the vessel.

Code: 71682

Meets ISAF regulation

How to attach on the rails

ATTENTION: End line is advised to be attached to boat for extra security. Care should be taken when re-packing the retrieval line to ensure successful deployment
